

Coarse Indian waste wool-based Wool shoes

India produces coarse wool which is not sought after because of its coarse diameter, presence of medullation, inferior quality of the product and difficulties during the processing. For this reason, wool is often discarded & not been fully utilized. However, sheep wool is well regarded as one of the most performative natural fibre having moisture management properties, thermal insulating properties. Being the natural fibres wool based shoes are having Superior comfort, good Moisture wicking.

Novelty of product:

- **Shoes:** Based on sheep wool which is natural fibre and biodegradable and balance the humidity inside the shoe.
