

Knotless, UV resistant Knotless nets for Sports & Landscaping application

Knotless nets are produced using Raschel warp knitting technology using UV treated, HDPE based fibres and having diamond mesh which are Knot free. Knotless nets as compared to knotted nets have Excellent abrasion resistance, High resistance to tension ,durability, stability with better price to performance ratio. This net is particularly suitable to be used in sporting and all kinds of Landscaping applications

Novelty of product:

- **Landscaping application:** 10 GSM light weight UV resistance HDPE based knotless nets
- **Sports application:** Polyester based knotless nets with better durability, stability & strength than existing knotted nets
